

COLUMBIA

Celebrating 150 Years of Learning, Craftsmanship, and Innovation

For 150 years, Columbia has been shaping the spaces where learning happens.

Founded in 1877 on a tradition of American craftsmanship, we've remained dedicated to building high-quality, durable furniture designed for today's classrooms—and tomorrow's. We continuously evolve our processes and products with one goal in mind: creating better learning environments for every student.

Inclusivity, mobility, agility, and collaboration aren't just buzzwords at Columbia—they're embedded in everything we do. We believe innovation only matters when it's built on quality. That commitment lives in our skilled workforce, our in-house manufacturing, and our culture of craftsmanship. It's why Columbia products continue to stand the test of time. As we celebrate our 150th year, we honor our past, take pride in our people, and look ahead with purpose—committed to supporting education for generations to come.

Columbia's stewardship initiative has been a part of our culture for years. With a corporate history dating back to 1877, we are acutely aware of our impact on the community we live in and the communities we serve.

We are dedicated to:

- being accountable for the costs we impose on the environment, our communities and neighbors near our facility
- treating our employees with kindness and respect.

Our commitment to sustainability through recycling is mirrored in the products we make, the manufacturing processes we utilize and the fundamental core values of our company. The following outlines some of our environmental achievements:

- Elimination of 100% of all V.O.C.'s with our painting operation that is 100% powder coating.
- Reduction of water usage from 150,000 gallons/day to 3,000 gallons/day.
- Using 100% recycled wood flour in hard plastic seats, backs and tops.
- Using up to 25% recycled post industrial products in soft plastic components.
- Recycling 100% of excess wood products and pallets.
- Recycling 100% cardboard and paper products.
- Recycling 100% of scrap steel.

Plating

Our award winning state-of-the-art plating line is the first and only 100% closed loop plating operation within our industry. Exterior nickel chrome plating achieved via a comprehensive multi-stage cleaning and etching process prior to a chrome over nickel plating finish.

Painting

All Columbia product calling for paint is applied using our powder coat process, a completely environmentally sound method resulting in a textured finish of pure epoxy blend resins that FAR exceeds standard powder coat finishes.

Made in the USA. Built to Perform.

At Columbia, manufacturing isn't outsourced—it's owned. Nearly every component is produced right here in our Westfield, Massachusetts facility using our in-house capabilities, including precision tube cutting and bending, hard plastic molding, and our own plating and paint lines. This hands-on approach ensures unmatched quality control, faster lead times, and products you can rely on for years to come. We don't depend on overseas sourcing, Columbia delivers true American craftsmanship—engineered, built, and assembled under one roof.

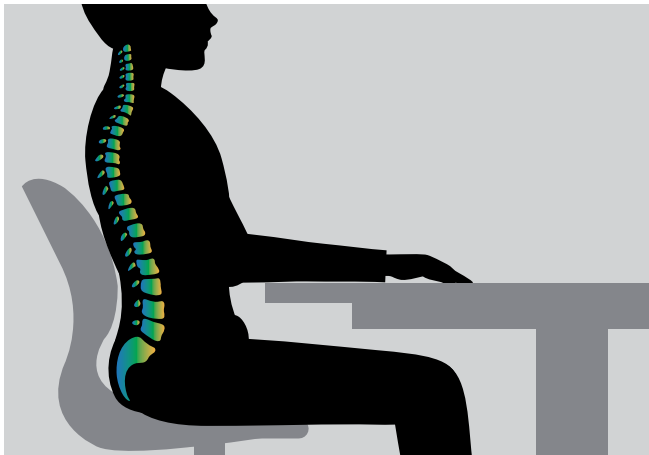

Fabrication

With over 150 years of experience in building frames, we understand how to optimize the strength and structural integrity of steel tubing. A mandrel bending process achieves a bend that is superior in strength to press bends and to frame designs with parallel tubing. All exposed intersecting tubes are contoured and 360° welded to create frames unmatched for toughness and durability.

Finishes

Columbia frame finishes are not only attractive but are extremely durable and applied using our award winning environmentally sound processes. Highlighted by our state-of-the-art plating line, our exterior grade nickel chroming process provides a luxurious gleaming finish while recapturing and recycling all usable water and chemicals. Our Spec Flek® powder coat process far exceeds standard formulas with the use of epoxy resins resulting in a finish 17% thicker than others with very high mechanical properties.

Ergonomic Design

Student comfort and performance is the criteria behind our ergonomically designed polypropylene shell found on our Classic Comfort line. Our Omnia and Silhoflex lines offer the ultimate in comfort and ergonomics with seating that provides flex while encouraging good posture.

Felt, Armor, Steel Glide

Columbia offers a wide array of glide options beyond the standard Armor glide (nylon) including steel, felt or Q-ball.

Omnia Chairs

Our premier line of classroom furniture is fashion forward and elegant yet practical. Affordably priced and packed with superb styling and durability. Omnia classroom furniture "has it all!"

Omnia Cantilever Chair

Omnia Cantilever Chairs combine aesthetic sophistication with product durability. Double walled, ergonomically designed wrap around shell offers maximum comfort along with rugged forward leaning flexible steel frames for strength and structural integrity. The Omnia chair is designed to easily stack on desks and is available in four popular sizes. Full steel sled base support rails with steel extensions prevent tipping.

Silhoflex

Incredibly Strong and Durable

Ergonomically Designed for Comfort with Lumbar Support Ribless

Shell Design

Silhoflex Stack Chair

Silhoflex seating features a durable polypropylene shell with an anti-static surface and a lumbar support system, which forces proper posture reducing fatigue. The waterfall design is contoured for optimum posture, comfort and flexibility. For maximum support, the shell rests directly on the frame, which is made with 1" and or 1 1/8" diameter and between 18 and 16 gauge steel tubing, with 16 gauge mounting brackets. Available with book basket. Back of shell is attractive, ribless and easy to clean and is attached with four concealed steel rivets. Chairs stack up to 20 high to save space.

Ergonomics in the Classroom

Classroom furniture can make learning easier or harder for students. Columbia's Ergonomic Classic Comfort exclusive built-in lumbar support makes any learning environment easier by removing physical restraints, large and small, to allow the student to concentrate on the day's lesson.

Classic Comfort Series Correct Posture

- Convex Curvature
- Proper Leg Distance
Waterfall seat design promotes proper blood circulation in legs.

Incorrect Posture

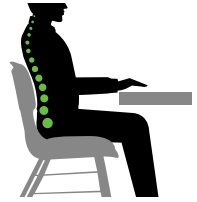

- Forces concave curvatures, resulting in fatigue
- Knees too close, restricts blood flow, causes legs to fall asleep.

CLASSIC COMFORT

Classic Comfort Chair

Our most popular soft plastic chair is ergonomically designed with our exclusive built in lumbar support promoting proper posture. A one piece polypropylene shell is securely fastened to our best stacking chair frame.

SILHOFLEX COMBO/TABLET

Silhoflex Dual Entry

Our Silhoflex waterfall seat is contoured for optimum posture, comfort and flexibility, and attached with four concealed steel rivets. A durable polypropylene shell with anti-static surface is just as attractive in the front and back of the seat and the ribless design is easy to clean. Our lumbar support system forces proper posture reducing fatigue and the shell rests directly on the frame for maximum support.

Choose from Columbia's exclusive Sled Base Steel, Felt or Armor Glides. Two optional hard rubber casters (shown) added to front bottom of frame allowing for a wheel barrel effect when moving unit to another location.

Silhoflex Chair/Desk Combo

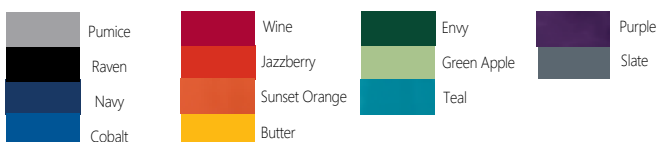

Same durable Silhoflex design as our dual entry. Choose from Columbia's exclusive Sled Base Steel, Felt or Armor Glides. Two optional hard rubber casters added to front bottom of frame allowing for a wheel barrel effect when moving unit to another location.

- Durable polypropylene shell with anti-static surface
- Lumbar support system forces proper posture reducing fatigue
- Shell rests directly on frame for maximum support
- Frame made with 1" and 1¼" diameter and 16 gauge steel tubing with 16 gauge mounting brackets
- Front leg swaged design for aesthetically pleasing appearance

All Silhoflex chairs pass CAL133 testing without any added harmful chemicals.

Innovation Comes in All Shapes and Sizes

Grouped together, or by themselves, the possibilities are endless with one of the largest selections of table sizes and shapes in the industry. It's as easy as 1, 2, 3.

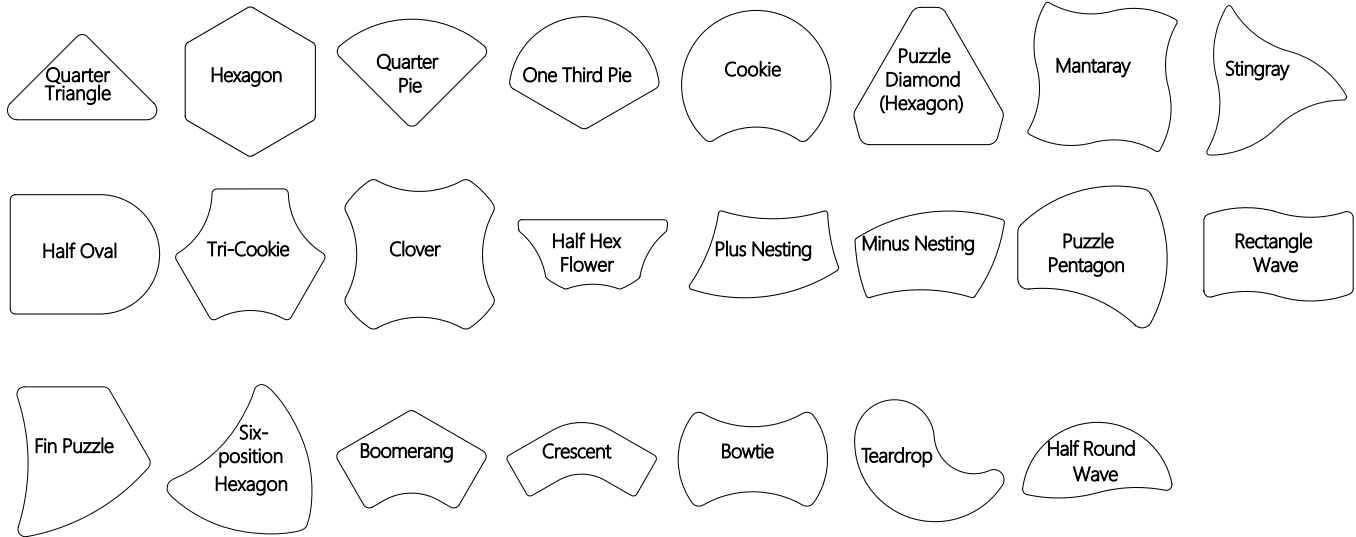

- 1 Pick your shape and size.
- 2 Select your color.
- 3 Add leg options. Done!

Columbia Activity Tables are made of Northern Canadian wood in PB or MDF core with HPL laminate on both the top and bottom for a perfectly balanced work surface. All "T" mold edges are perfectly trimmed to surface on top and bottom and are mechanically fastened to the surface. All tables over 60" are supplied with a stretcher bar for added strength and stability.

Square Planner Table

Galaxy Planner tables are designed for any learning environment. Made of Northern Canadian wood at 48-50 lbs. makes this the densest table top in the industry that will provide a lifetime of service.

Columbia exclusive 10 gauge "L" brackets are coupled with a fully welded 1"x1"x16 gauge apron and 28 factory preassembled fasteners so final installation requires only one screw per leg. Made of either 2.219" O.D. upper Galaxy legs and 2" lower leg for adjustable units and 2" Round CRS steel for fixed height units. Tables can be equipped with four locking casters, two casters and two glides or four glides.

Custom sizes available upon request.

Apron ships assembled to the top.
